

Solutions for Education

Schools and universities have grown increasingly dependent on video surveillance to deter theft, and protect students, faculty, and personnel. With advances in technology, video systems that were once solely intended to provide for security and risk management are now much more capable and have a far greater impact to the overall campus experience.

DIGIOP's video and data management software (VDMS) solutions provide intelligent visual integration with existing systems to address concerns that are faced by educational institutions of every size and at all levels.

Use DIGIOP Education Solutions to:

Promote General Safety Improve security for your students, staff, and campus personnel

Enhance Student Experience Reduce crowding, improve parking, and use video as an educational/training tool

Reduce Theft and Vandalism Deter and/or prevent internal and external theft, decrease vandalism

Mitigate Campus Risk Reduce likelihood and cost of defending fraudulent claims and lawsuits

Improve Operational Consistency Monitor and maintain system-wide operational standards

Technology
Alliance Partner
