1.0 Kiosk Mode

When installing DIGIOP Connect, you can configure DIGIOP to operate in Kiosk Mode. In this mode, the application opens automatically in full-screen view mode after a Windows user logs into the system. DIGIOP® users who login to Connect without the administrator permission can logout of Connect, but cannot close the application or access the Windows desktop. Users with administrator permission in DIGIOP® can logout and close the application, and then access the Windows desktop.

Kiosk mode is ideal for remote clients at security stations. If you have accidentally installed DIGIOP Connect in Kiosk mode, you can easily disable Kiosk mode through the Windows Control Panel.

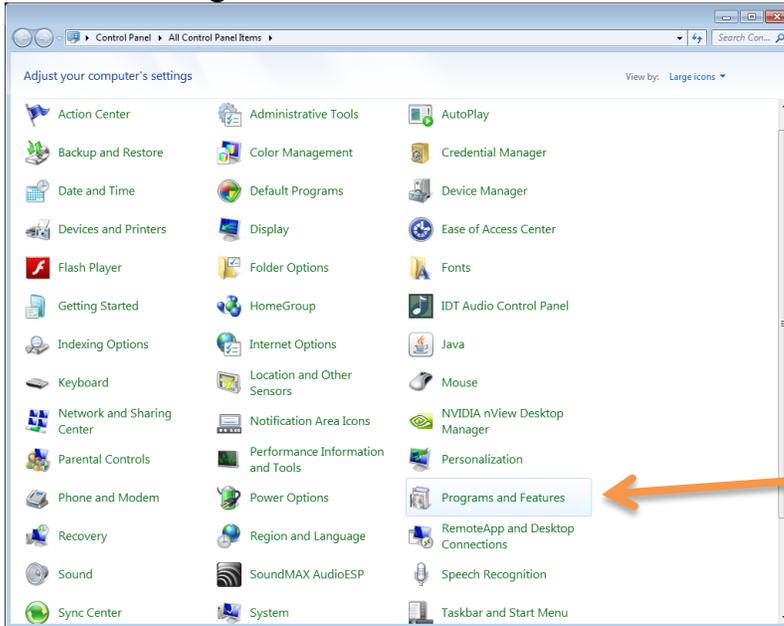

Log in to Connect as the **Admin** user. Once logged in, you can exit the DIGIOP™ Connect software and have full access to your Windows Desktop.

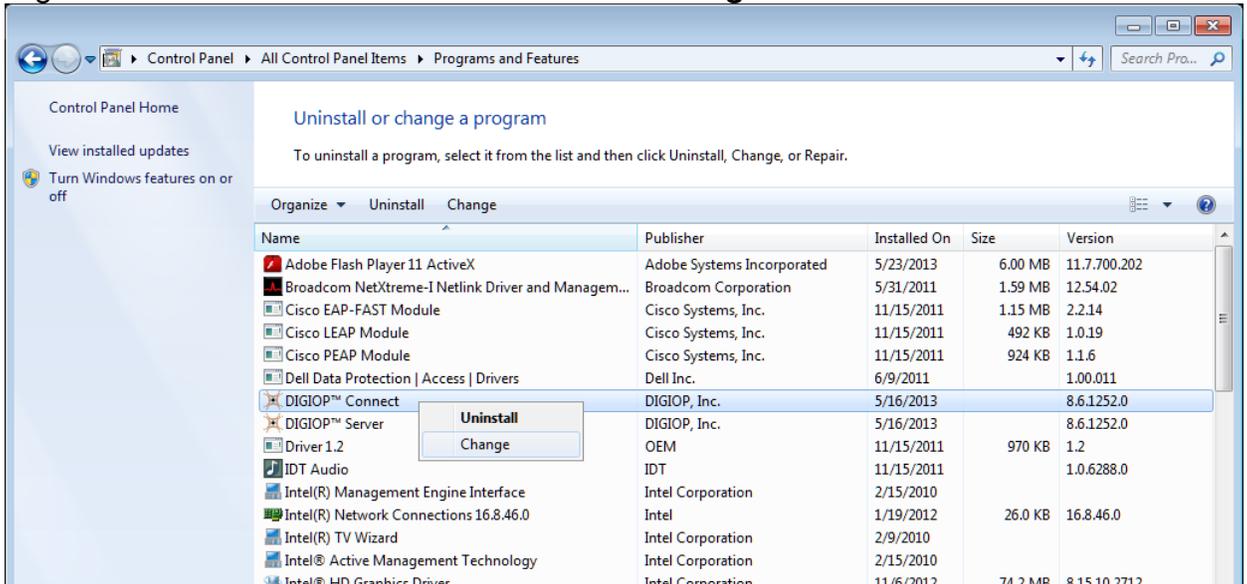

2.0 Disabling Kiosk Mode

Steps:

1. Browse to **Programs and Features** in **Control Panel**.

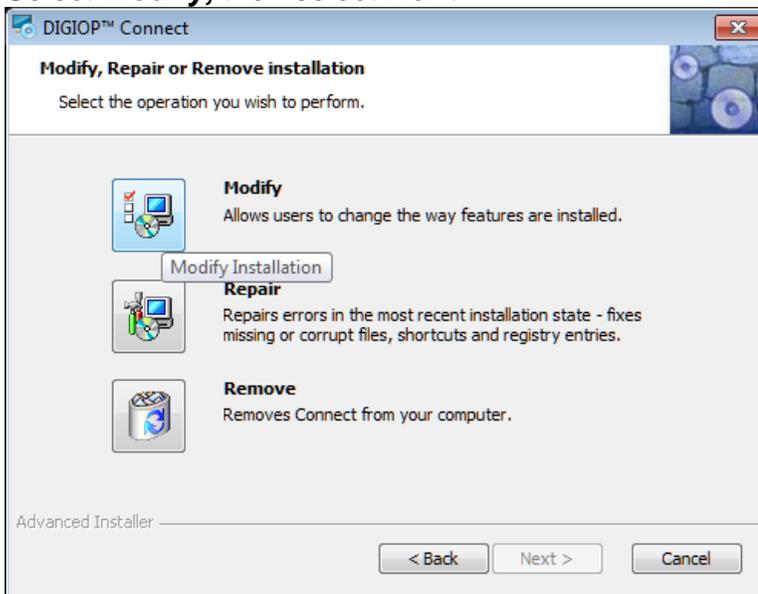

2. Right click on **DIGIOP™ Connect** and select **Change**.

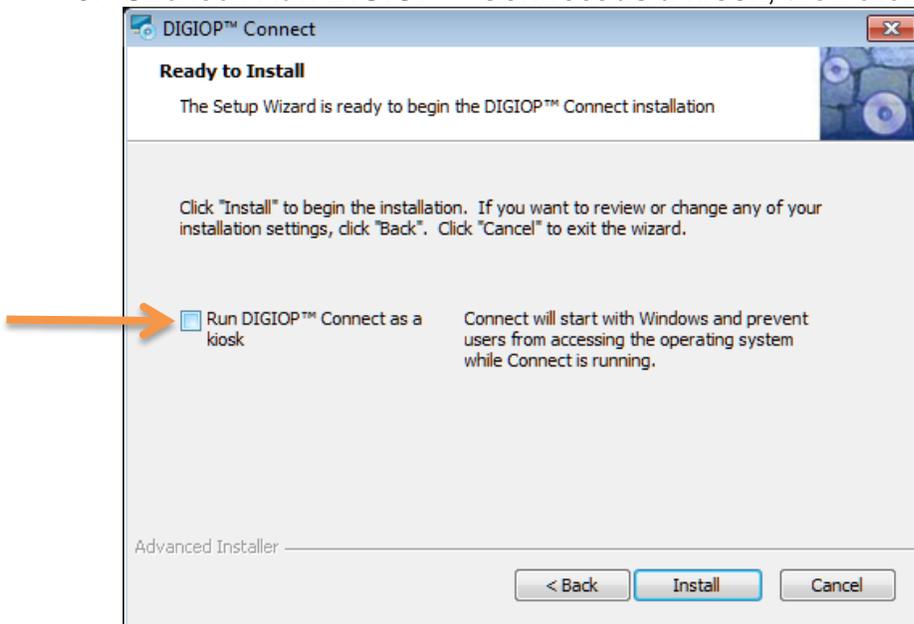

3. When the Setup Wizard pops up, click the **Next** button.

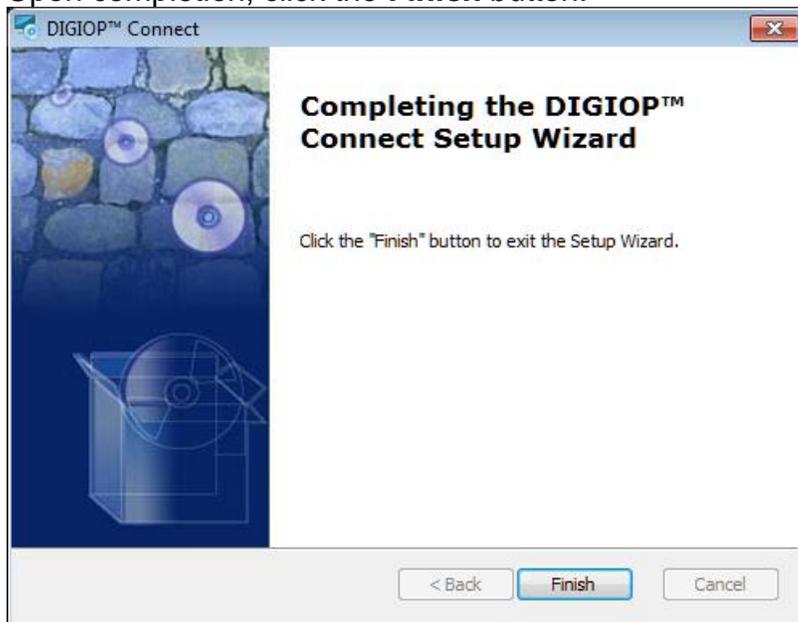

4. Select **Modify**, then select **Next**.

5. Uncheck **Run DIGIOP™ Connect as a kiosk**, then click **Install**.

6. Upon completion, click the **Finish** button.

Congratulations! You have successfully disabled Kiosk Mode on your DIGIOP Server.
